Add tenths and hundredths as fractions

I can… rename tenths as hundredths before adding.

Walk 3/10 kilometer, then 24/100 kilometer.

3/10 = 30/100

30/100 + 24/100 = 54/100

54/100 kilometer = 0.54 kilometer

The 3 tenths were renamed, not changed. Count like-size parts before joining them.
