Choose related common denominators

I can… rename related fractional units before adding or subtracting.

Units in the problem	Useful shared unit
Thirds and sixths	Sixths
Fourths and eighths	Eighths
Fifths and tenths	Tenths

1/3 + 1/6 = 2/6 + 1/6

= 3/6 = 1/2

Thirds and sixths are different-size pieces. Partitioning each third into two sixths lets us combine them.
