Check unit-fraction division with multiplication

I can… explain and check either type of unit-fraction division.

Question	Equation
How many fourths are in 3?	3 ÷ 1/4 = 12
Share 1/4 equally among 3.	1/4 ÷ 3 = 1/12

12 × 1/4 = 3

3 × 1/12 = 1/4

The first answer counts pieces. The second names the size of each share. The same numbers describe different stories.
