Subtraction algorithm: rename, then subtract

I can… connect renamed units to a standard subtraction calculation.

	4	12	11	13	11
	~~5~~	~~3~~	~~2~~	~~4~~	~~1~~
−	1	8	7	6	5
	3	4	4	7	6

Before subtracting, rename 53,241 as:
4 ten-thousands + 12 thousands + 11 hundreds + 13 tens + 11 ones.

53,241 − 18,765 = 34,476

34,476 + 18,765 = 53,241
