Convert within a measurement system

I can... use a provided conversion chart to solve a conversion problem.

Use the given relationship

Given	Conversion
1 foot = 12 inches	2.5 feet = ? inches
1 meter = 100 centimeters	350 centimeters = ? meters

Multiply for smaller units

2.5 × 12 = 30 inches

Divide for larger units

350 ÷ 100 = 3.5 meters
