What is unknown in a comparison?

I can... solve a multiplicative comparison with any quantity unknown.

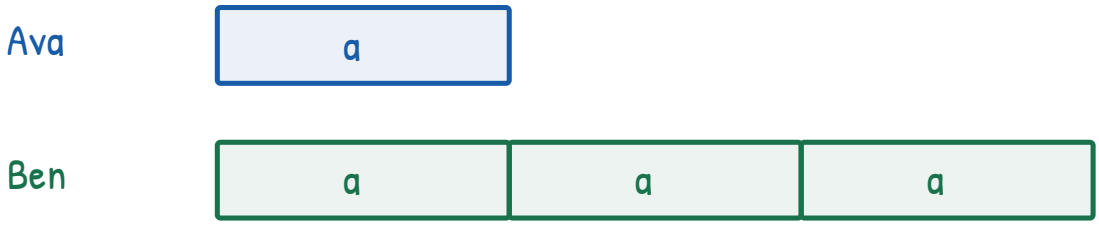
Larger amount unknown

Ava has 5 cards. Ben has 3 times as many.

$3 \times 5 = b \rightarrow b = 15$ cards

Smaller amount unknown

Ben has 15 cards, 3 times Ava's amount.



$3 \times a = 15 \rightarrow a = 5$ cards

Multiplier unknown

Ben has 15 cards. Ava has 5. How many times as many does Ben have?

$m \times 5 = 15 \rightarrow m = 3$
