Decompose and rename fractions

I can... write a fraction as a sum in more than one way.

Three ways to make 5/6

5/6

5/6 = 1/6 + 1/6 + 1/6 + 1/6 + 1/6

5/6 = 2/6 + 3/6 = 4/6 + 1/6

Rename an amount greater than one

8/6 = 6/6 + 2/6 = 1 2/6

Six sixths make one whole. Two more sixths remain.
