Add and subtract mixed numbers

I can... rename a whole to add or subtract mixed numbers.

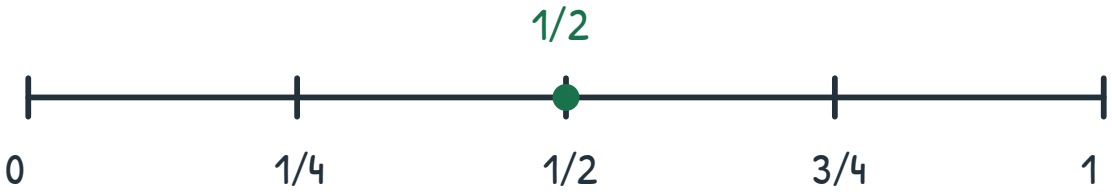
Subtract: 2 1/4 – 1 3/4

2 1/4 = 1 + 4/4 + 1/4 = 1 5/4

Rename one whole as four fourths. The amount is still 2 1/4.

Now subtract

1 5/4 – 1 3/4 = 2/4 = 1/2



Addition may make a whole

1 3/4 + 2 2/4 = 3 5/4 = 4 1/4
