Ask a question and organize data

I can... distinguish data types and organize numerical data in a frequency table.

What kind of answer?

Question	Data type
What is your favorite fruit?	Categorical: names
How many pets do you have?	Numerical: counts

Collect whole-number data

Pet counts: 0, 1, 2, 1, 0, 3, 2, 1, 1, 2

Count each value

Pets	Frequency
0	2
1	4
2	3
3	1

2 + 4 + 3 + 1 = 10 students
