Check your answer

I can… use estimation and an inverse operation to check an answer.

Make an estimate

A library has 248 fiction books and 176 nonfiction books. How many books?

250 + 180 = 430 → about 430 books

Calculate and check

248 + 176 = 424

424 − 176 = 248

Does it fit the story?

424 is close to 430. The total is greater than either part. My answer is 424 books.
