Estimate with nearby friendly numbers

I can... estimate a sum or difference and assess whether an answer is reasonable.

Locate the number

Choose an estimate

$248 + 176 \approx 250 + 180 = 430$

Compare to the exact answer

$248 + 176 = 424$

424 is close to 430. Estimates depend on the purpose; they do not have to equal the exact answer.
