# Classify quadrilaterals by attributes

I can... use attributes to classify quadrilaterals.

## Start with four sides

A quadrilateral is a polygon with four sides.

## Use more specific attributes

| Shape | Attributes |
|---|---|
| Rectangle | 4 right angles |
| Rhombus | 4 equal sides |
| Square | 4 right angles AND 4 equal sides |

## Categories can overlap

A square is a rectangle and a rhombus. Each of these shapes is also a quadrilateral.
