Two patterns make ordered pairs

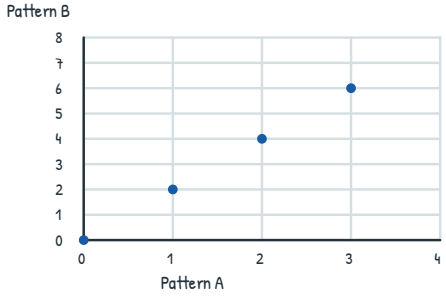
I can… generate two patterns, form ordered pairs, and explain their relationship.

Start both patterns at zero

Pattern A: add 1. Pattern B: add 2.

A	B	Ordered pair
0	0	(0, 0)
1	2	(1, 2)
2	4	(2, 4)
3	6	(3, 6)

Graph corresponding terms



Explain

Each B term is twice the corresponding A term. The points follow that relationship.
