Compare whole numbers

I can... compare whole numbers using the value of their digits.

Start with the greatest place

Place	47,305	47,350
Ten-thousands	4	4
Thousands	7	7
Hundreds	3	3
Tens	0	5

Find the first difference

47,305 < 47,350

The ten-thousands, thousands, and hundreds match. At the tens place, 0 tens is less than 5 tens.

Read the whole statement

"Forty-seven thousand three hundred five is less than forty-seven thousand three hundred fifty."
